SETI Exclusive Refilling Kit

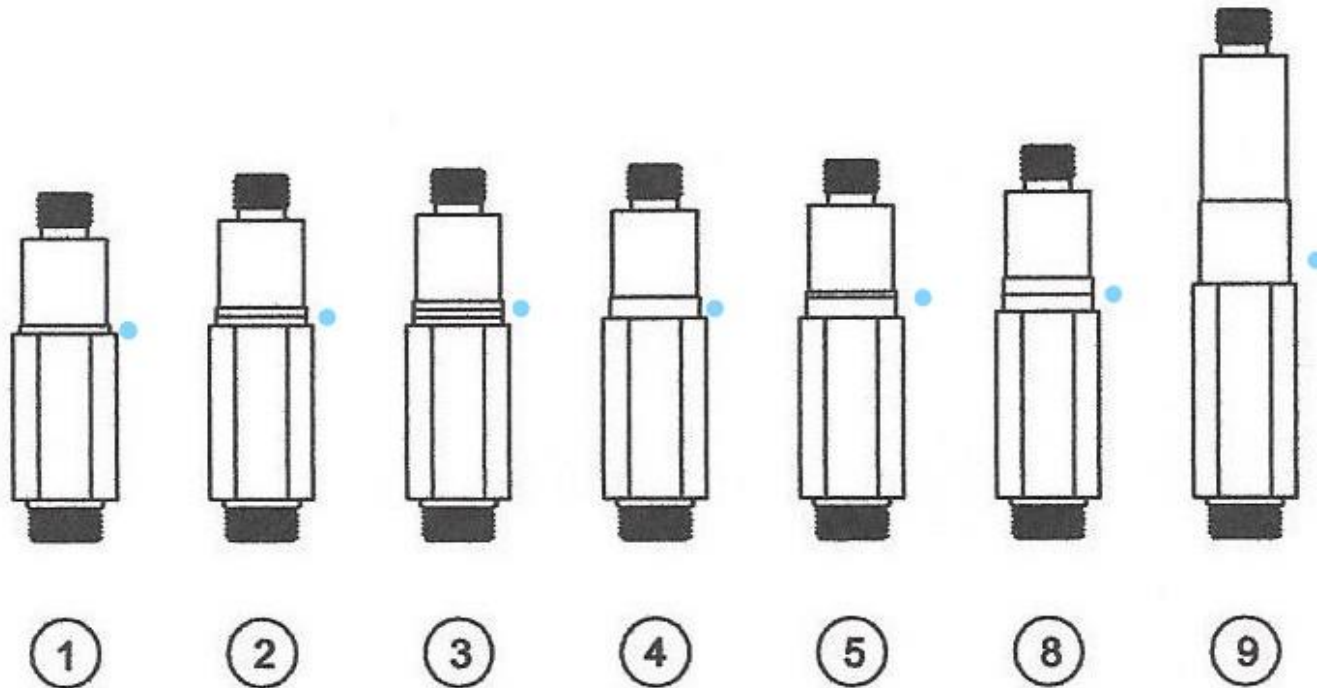

The SETI hand pump kit includes a convenient:

- Male quick connector for the hose to the pail lid to eliminate air before filling the pump
- Female quick connect for the hose to the Ecostar pump
- Boot to prevent plastic pail debris from entering the system, and
- A heavy-duty hand pump.

Assembly instructions and directions for use can be found under 'Filling the Reservoir' on the Care and Maintenance page

NEVER force the hand pump if there is resistance

Meters – the size of the meter is determined by the number of rings between the hex body and the cylindrical top, not the stamp on the meter.

(from Ecostar Manual, Ed. 12/12)

Meter Sizes 1-9

Grease Pump Parts – see Component Operating Principle – Grease Pump
